

Upute za instalaciju paketa

Ana Bokšić

1

Octave u paketu *symbolic* koristi programski jezik Python. Ukoliko imate problema s instalacijom paketa, vjerojatno ćete ga sada riješiti. Ovo su upute za one koji nemaju već instaliran Python.

Umjesto naredbom

```
pkg install -forge symbolic
```

morate ručno instalirati paket. Pratite sljedeće korake:

1. Preuzmite *symbolic-win-py-bundle-2.9.0.tar.gz* datoteku s ove [stranice](#).

v2.9.0

cbm755 released this on Mar 8, 2020

See the [NEWS file](#) for a list of changes.

Octave users can usually install with `pkg install -forge symbolic` (from within Octave, no need to download anything from this page). You will need Python and SymPy installed: Windows users may want to try the "bundle" package which includes these dependencies.
